Table of Contents Volume 167, 1986

Number 1

M.V. Gusev, T.G. Korzhenevskaya, L.V. Pyvovarova, O.I. Baulina, R.G. Butenko: Introduction of a nitrogen-fixing cyanobacterium into tobacco shoot regenerates 1

V.A. Smith, J. MacMillan: The partial purification and characterisation of gibberellin 2β-hydroxylases from seeds of *Pisum sativum* 9

K. Tanaka, S. Kitazawa, T. Sasaki, N. Ooshima, T. Yamada: Studies on the growth and development in *Spirogyra*. VI. Phototropic response of *Spirogyra* filaments 19

J.-M. Versel, P.-E. Pilet: Distribution of growth and proton efflux in gravireactive roots of maize (*Zea mays* L.) 26

P.C. Lolkema, R. Vooijs: Copper tolerance in *Silene cucubalus*. Subcellular distribution of copper and its effects on chloroplasts and plastocyanin systhesis 30

E. Van Volkenburgh, R.E. Cleland: Wall yield threshold and effective turgor in growing bean leaves 37

B. Deus-Neumann, M.H. Zenk: Accumulation of alkaloids in plant vacuoles does not involve an ion-trap mechanism 44

C. Wood, N. Burgess, D.R. Thomas: The dual location of β-oxidation enzymes in germinating pea cotyledons 54

N. Burgess, D.R. Thomas: Carnitine acetyltransferase in pea cotyledon mitochondria 58

K. Köhler, W. Steigner, J. Kolbowski, U.-P. Hansen, W. Simonis, W. Urbach: Potassium channels in *Eremosphaera viridis*. II. Current- and voltage-clamp experiments 66

M. Sabater, F. Sabater: Auxin carriers in membranes of lupin hypocotyls 76

U. Klein: Compartmentation of glycolysis and of the oxidative pentose-phosphate pathway in *Chlamydomonas reinhardii* 81

C. Gietl, B. Hock: Import of glyoxysomal malate dehydrogenase precursor into glyoxysomes: A heterologous in-vitro system 87

A.H. Halevy: The induction of contractile roots in *Gladiolus grandiflorus* 94

C.C.S. Chapple, M.A. Walker, B.E. Ellis: Plant tyrosine decarboxylase can be strongly inhibited by L-α-aminooxy-β-phenylpropionate 101

R. Oelmüller, H. Mohr: Photooxidative destruction of chloroplasts and its consequences for expression of nuclear genes 106

P.M. Dey, S. Naik, J.B. Pridham: Properties of α-galactosidase II[2] from *Vicia faba* seeds 114

N.J. Walton, H.W. Woolhouse: Enzymes of serine and glycine metabolism in leaves and non-photosynthetic tissues of *Pisum sativum* L. 119

P. Aducci, A. Ballio, M. Marra: Incubation of corn coleoptiles with auxin enhances in-vitro fusicoccin binding 129

P.G. Thomas, P.Z. Quinn, W.P. Williams: The origin of photosystem-I-mediated electron transport stimulation in heat-stressed chloroplasts 133

P. Gross, T. ap Rees: Alkaline inorganic pyrophosphatase and starch synthesis in amyloplasts 140

P. Hilditch, H. Thomas, L. Rogers: Leaf senescence in a non-yellowing mutant of *Festuca pratensis*: Photosynthesis and photosynthetic electron transport . . 146

Number 2

R.G. Mayne, H. Kende: Ethylene biosynthesis in isolated vacuoles of *Vicia faba* L. – requirement for membrane integrity 159

H.-H. Gerdes, H. Kindl: Partial purification and characterization of mRNAs encoding glycollate oxidase and catalase 166

L.R. Griffing, B.G. Mersey, L.C. Fowke: Cell-fractionation analysis of glucan synthase I and II distribution and polysaccharide secretion in soybean protoplasts. Evidence for the involvement of coated vesicles in wall biogenesis 175

U. Matern, C. Reichenbach, W. Heller: Efficient uptake of flavonoids into parsley (*Petroselinum hortense*) vacuoles requires acylated glycosides 183

J. Nguyen, L. Machal, J. Vidal, C. Perrot-Rechenmann, P. Gadal: Immunochemical studies on xanthine dehydrogenase of soybean root nodules. Ontogenic changes in the level of enzyme and immunocytochemical localization 190

W. Knogge, G. Weissenböck: Tissue-distribution of secondary phenolic biosynthesis in developing primary leaves of *Avena sativa* L. 196

G. Felix, F. Meins Jr: Developmental and hormonal regulation of β-1,3-glucanase in tobacco 206

D. Strack, J. Reinecke, S. Takeuchi: Evidence for a relationship between malate metabolism and activity of 1-sinapoylglucose: L-malate sinapoyltransferase in radish (*Raphanus sativus* L.) cotyledons 212

C.A. Adams, F. Leung, S.S.M. Sun: Molecular properties of phosphoenolpyruvate carboxylase from C_3, C_3-C_4 intermediate, and C_4 *Flaveria* species 218

R. Wagner, F. Feth, K.G. Wagner: The pyridine-nucleotide cycle in tobacco. Enzyme activities for the recycling of NAD 226

W.G. Heil, H. Senger: Thylakoid-protein phosphorylation during the life cycle of *Scenedesmus obliquus* in synchronous culture 233

F.D. Macdonald, J. Preiss: The subcellular location and characteristics of pyrophosphate-fructose-6-phosphate 1-phosphotransferase from suspension-cultured cells of soybean 240

D.J. Gillham, A.D. Dodge: Hydrogen-peroxide-scavenging systems within pea chloroplasts. A quantitative study 246

D. Melroy, R.L. Jones: The effect of monensin on intracellular transport and secretion of α-amylase isoenzymes in barley aleurone 252

K.-J. Dietz: An evaluation of light and CO_2 limitation of leaf photosynthesis by CO_2 gas-exchange analysis 260

C.M. Bowman: Copy numbers of chloroplast and nuclear genomes are proportional in mature mesophyll cells of *Triticum* and *Aegilops* species 264

J.S. Greenwood, H.M. Stinissen, W.J. Peumans, M.J. Chrispeels: *Sambucus nigra* agglutinin is located in protein bodies in the phloem parenchyma of the bark 275

K.D. Mukherjee: Glycerolipid synthesis by homogenate and oil bodies from developing mustard (*Sinapis alba* L.) seed 279

D. Ritz, M. Kluge, H.J. Veith: Mass-spectrometric evidence for the double-carboxylation pathway of malate

synthesis by Crassulacean acid metabolism plants in light 284
W.M. Kaiser, G. Schröppel-Meier, E. Wirth: Enzyme activities in an artificial stroma medium. An experimental model for studying effects of dehydration on photosynthesis 292

Short communication

R. Federico, R. Angelini: Occurrence of diamine oxidase in the apoplast of pea epicotyls 300

Number 3

H.H. Zahran, J.I. Sprent: Effects of sodium chloride and polyethylene glycol on root-hair infection and nodulation of *Vicia faba* L. plants by *Rhizobium leguminosarum* 303
M. Amann, G. Wanner, M.H. Zenk: Intracellular compartmentation of two enzymes of berberine biosynthesis in plant cell cultures 310
D.A. DeMason, J.I. Stillman: Identification of phosphate granules occurring in seedling tissue of two palm species (*Phoenix dactylifera* and *Washingtonia filifera*) 321
D.W. McCurdy, L.H. Pratt: Kinetics of intracellular redistribution of phytochrome in *Avena* coleoptiles after its photoconversion to the active, far-red-absorbing form 330
E. Schnepf, G. Drebes: Chemotaxis and appetence of *Paulsenella* sp. (Dinophyta), an ectoparasite of the marine diatom *Streptotheca thamesis* Shrubsole . . 337
J.R. Evans, R.B. Austin: The specific activity of ribulose 1,5-bisphosphate carboxylase in relation to genotype in wheat 344
J.R. Evans: The relationship between carbon-dioxide-limited photosynthetic rate and ribulose-1,5-bisphosphate-carboxylase content in two nuclear-cytoplasm substitution lines of wheat, and the coordination of ribulose-bisphosphate-carboxylation and electron-transport capacities 351
J.L. Stoddart, H. Thomas, E.J. Lloyd, C.J. Pollock: The use of a temperature-profiled position transducer for the study of low-temperature growth in Gramineae. Equipment design and output interpretation 359
J.L. Stoddart, E.J. Lloyd: Modification by gibberellin of the growth-temperature relationship in mutant and normal genotypes of several cereals 364
C. Foyer, C. Spencer: The relationship between phosphate status and photosynthesis in leaves. Effects on intracellular orthophosphate distribution, photosynthesis and assimilate partitioning 369
K.-J. Dietz, C. Foyer: The relationship between phosphate status and photosynthesis in leaves. Reversibility of the effects of phosphate deficiency on photosynthesis 376
A. Sellstedt: Acetylene reduction, H_2 evolution and $^{15}N_2$ fixation in the *Alnus incana-Frankia* symbiosis . . . 382
A. Sellstedt, K. Huss-Danell: Biomass production and nitrogen utilization by *Alnus incana* when grown on N_2 or NH_4^+ made available at the same rate 387
D.R. Roberts, E.B. Dumbroff, J.E. Thompson: Exogenous polyamines alter membrane fluidity in bean leaves – a basis for potential misinterpretation of their true physiological role 395
M.J. Saunders: Cytokinin activation and redistribution of plasma-membrane ion channels in *Funaria*. A vibrating-microelectrode and cytoskeleton-inhibitor study 402
M. Thom, R.A. Leigh, A. Maretzki: Evidence for the involvement of a UDP-glucose-dependent group translocator in sucrose uptake into vacuoles of storage roots of red beet 410
R.-T. Prinsley, S. Hunt, A.M. Smith, R.C. Leegood: The influence of a decrease in irradiance on photosynthetic carbon assimilation in leaves of *Spinacia oleracea* L. 414

Short communication

B.H. Brown, S.J. Neill, R. Horgan: Partial isotope fractionation during high-performance liquid chromatography of deuterium-labelled internal standards in plant hormone analysis: a cautionary note 421

Number 4

K.A. Van den Bosch, E.H. Newcomb: Immunogold localization of nodule-specific uricase in developing soybean root nodules 425
T. Hogetsu: Re-formation of microtubules in *Closterium ehrenbergii* Meneghini after cold-induced depolymerization 437
C. Schächtele, M. Steup: α-1,4-Glucan phosphorylase forms from leaves of spinach (*Spinacia oleracea* L.) I. In situ localization by indirect immunofluorescence 444
P.M. Norman, V.P.M. Wingate, M.S. Fitter, C.J. Lamb: Monoclonal antibodies to plant plasma-membrane antigens 452
D.H. Simmonds, G. Setterfield: Aberrant microtubule organization can result in genetic abnormalities in protoplast cultures of *Vicia hajastana* Grossh. 460
D.H. Simmonds: Prophase bands of microtubules occur in protoplast cultures of *Vicia hajastana* Grossh. . . 469
U.B. Barwale, H.R. Kerns, J.M. Widholm: Plant regeneration from callus cultures of several soybean genotypes via embryogenesis and organogenesis 473
R. Krauspe, A. Scheer, S. Schaper, P. Bohley: Proteolysis in *Euglena gracilis*. II. Soluble and particle-bound acidic proteinase activities of the cysteine and aspartic types during growth and chloroplast development 482
C. Sautter: Microbody transition in greening watermelon cotyledons. Double immunocytochemical labeling of isocitrate lyase and hydroxypyruvate reductase . . . 491
L. Lalonde, J.D. Bewley: Patterns of protein synthesis during the germination of pea axes, and the effects of an interrupting desiccation period 504
C. Bouet, R. Schantz, G. Dubertret, B. Pineau, G. Ledoigt: Translational regulation of protein synthesis during light-induced chloroplast development in *Euglena* 511
G. Borraccino, S. Dipierro, O. Arrigoni: Purification and properties of ascorbate free-radical reductase from potato tubers 521
U. Kutschera, P. Schopfer: Effect of auxin and abscisic acid on cell wall extensibility in maize coleoptiles . . 527
D.M.J. Dickson, G.O. Kirst: The role of β-dimethylsulphoniopropionate, glycine betaine and homarine in the osmoacclimation of *Platymonas subcordiformis* . . . 536
A. Musgrave, P. de Wildt, L. van Etten, H. Pijst, C. Scholma, R. Kooyman, W. Homan, H. van den Ende: Evidence for a functional membrane barrier in the transition zone between the flagellum and cell body of *Chlamydomonas eugametos* gametes 544
U. Heber, S. Neimanis, O.L. Lange: Stomatal aperture, photosynthesis and water fluxes in mesophyll cells as affected by the abscission of leaves. Simultaneous mea-

surements of gas exchange, light scattering and chlorophyll fluorescence 554
R. Behl, K. Raschke: Effects of abscisic acid on sequestration and exchange of Na^+ by barley roots 563
E. Pönsgen, A. Betz: Isocitrate lyase of the alga *Chlorogonium elongatum*: Immunological quantification in relation to growth conditions 569
H.J. Steinbiß, K. Zetsche: Light and metabolite regulation of the synthesis of ribulose-1,5-bisphosphate carboxylase/oxygenase and the corresponding mRNAs in the unicellular alga *Chlorogonium* 575
E. Roscher, K. Zetsche: The effects of light quality and intensity on the synthesis of ribulose-1,5-bisphosphate carboxylase and its mRNAs in the green alga *Chlorogonium elongatum* 582
N. Di Fonzo, L. Manzocchi, F. Salamini, C. Soave: Purification and properties of an endospermic protein of maize associated with the *Opaque-2* and *Opaque-6* genes 587
V.V. Mosoloy, M.N. Shul'gin: Protein inhibitors of microbial proteinases from wheat, rye and triticale . . 595
